COMMITMENT

Summit Construction continues to advocate mentorship and career education programs for our community's youth. We envision our commitment to the youth of our own hometown and community to span long term. Having served as the privileged builder for education and library projects throughout the county, we strive to give back through educating today's young men and women.

CONTRIBUTIONS / EVENTS / SERVICES

Summit Construction has partnered with several school districts through involvement in their career days, volunteer education such as Junior Achievement, building "walk-throughs," and career education sessions. Our goal is to highlight and bring to the youth's attention the opportunities in construction management, skilled trades, and engineering.
